

Michael ANDERSON

ACOUSTICS SPECIALIST

Resourceful Acoustics Engineer with 6 years of experience in the construction industry, focusing on noise control and sound insulation in commercial and residential buildings. I have a strong track record of collaborating with architects and contractors to develop effective acoustic solutions that meet building codes and enhance occupant comfort. My approach is data-driven, utilizing acoustic modeling software to predict sound behavior in various environments.

SKILLS

- Noise control
- Sound insulation
- Acoustic modeling
- Site assessment
- Client communication
- Report writing

LANGUAGES

- English
- Spanish
- French

EDUCATION

**BACHELOR OF SCIENCE IN
ACOUSTICAL ENGINEERING, INSTITUTE
OF SOUND, 2014**

ACHIEVEMENTS

- Successfully reduced noise complaints from occupants by 40% through effective design improvements.
- Awarded Best New Employee for contributions to project success in the first year.
- Developed a sustainable acoustic design approach that was adopted by the firm.

WORK EXPERIENCE

ACOUSTICS SPECIALIST

QuietSpace Design Group

2020 - 2025

- Conducted acoustic analyses for various building projects, leading to a 15% improvement in sound insulation ratings.
- Collaborated with architects to integrate sound-absorbing materials into building designs.
- Performed site visits to assess existing acoustic conditions and recommend improvements.
- Utilized software such as Odeon for acoustic modeling and prediction.
- Developed detailed reports outlining findings and recommendations for clients.
- Engaged in client consultations to discuss project goals and acoustic challenges.

JUNIOR ACOUSTICS ENGINEER

BuildRight Associates

2015 - 2020

- Assisted in developing noise control strategies for residential construction projects.
- Conducted field measurements to assess sound levels and identify sources of noise.
- Collaborated with project managers to ensure compliance with sound regulations.
- Participated in client meetings to present findings and recommendations.
- Maintained records of testing and analysis for project documentation.
- Engaged in professional development to enhance knowledge of acoustics and building codes.
