- Environmental Technology
- Cloud Computing
- Project Management
- User Engagement
- Sustainability
- API Development

LANGUAGES

- English
- Spanish
- French

EDUCATION

BACHELOR OF SCIENCE IN ENVIRONMENTAL SCIENCE, GREEN UNIVERSITY, 2017

ACHIEVEMENTS

- Led a project that reduced water consumption by 40% in partner farms through software solutions.
- Recognized for excellence in leadership by the EcoTech Awards in 2022.
- Facilitated training for over 500 farmers on sustainable practices and technology use.

WORK EXPERIENCE

PRODUCT MANAGER - AGRITECH SOLUTIONS

EcoFarm Technologies

2020 - 2025

- Managed product development for an innovative software suite aimed at sustainable farming.
- Coordinated with developers to ensure alignment with environmental regulations.
- Conducted market research to identify user needs and feature enhancements.
- Oversaw the implementation of user feedback into product iterations.
- Developed strategic partnerships with agricultural organizations to promote software usage.
- Monitored product performance and user engagement metrics for continuous improvement.

SOFTWARE ENGINEER

Sustainable AgriTech

2015 - 2020

- Developed an application for tracking and managing water usage in agriculture.
- Integrated machine learning algorithms to forecast irrigation needs.
- Collaborated with environmental scientists to ensure software meets sustainability standards.
- Participated in user training sessions to promote software adoption.
- Assisted in the development of API integrations for seamless data exchange.
- Provided technical support and troubleshooting for end-users.
