## WORK EXPERIENCE

### EdTech AI Developer

2020-2023

LearnSmart Technologies

- Developed AI applications that provided personalized learning pathways, improving student engagement by 40%.
- Collaborated with educators to design features that met curriculum standards.
- Implemented data analytics tools to track student performance and provide actionable insights.
- Engaged in user testing to enhance the usability of educational applications.
- Presented findings at educational technology conferences, sharing best practices.
- Contributed to open-source projects aimed at improving educational access through technology.

### Software Engineer

2019-2020

EduTech Solutions

- Assisted in the development of educational software with integrated AI functionalities.
- Conducted research on AI applications in education to inform product development.
- Collaborated with design teams to create user-friendly interfaces for learning applications.
- Engaged in continuous learning to stay current with trends in educational technology.
- Provided technical support for educational applications, resolving user issues effectively.
- Worked on data visualization projects to illustrate student learning outcomes.

## ACHIEVEMENTS

- Recognized for developing an AI feature that increased student retention rates by 20%.
- Contributed to a project that won an industry award for innovation in education technology.
- Published articles on AI applications in education in leading educational journals.
