EDUCATION

Master of Science in Telecommunications Engineering

Georgia Institute of Technology
2016-2020

SKILLS

- Machine Learning
- Network Optimization
- Big Data Analytics
- Python
- Telecommunications
- Predictive Maintenance

LANGUAGES

- English
- Spanish
- French

Experienced AI Engineer with 9 years in the telecommunications industry, focusing on AI-driven network optimization and predictive maintenance. Expert in developing algorithms that enhance network performance and reliability, leveraging machine learning and big data analytics. Proven ability to collaborate with engineering teams to implement AI solutions that improve service quality and reduce operational costs.

WORK EXPERIENCE

Senior AI Engineer
Telecom Solutions Inc.
2020-2023

- Developed machine learning models for network traffic prediction, improving bandwidth allocation by 20%.
- Collaborated with cross-functional teams to integrate AI solutions into existing network management systems.
- Implemented predictive maintenance algorithms that reduced equipment failures by 30%.
- Utilized big data analytics for real-time monitoring of network performance metrics.
- Presented insights and findings to executive leadership, driving strategic initiatives in AI deployment.
- Contributed to research and development projects that enhanced network optimization techniques.

AI Research Engineer
NextGen Telecom
2019-2020

- Analyzed network data to develop models for predicting service outages, improving response times by 40%.
- Worked closely with software engineers to build AI tools for automating network management tasks.
- Conducted training sessions for technical staff on AI methodologies and applications.
- Participated in industry forums to share insights on AI trends in telecommunications.
- Led projects that integrated AI capabilities into legacy systems, enhancing overall system efficiency.
- Received accolades for contributions to AI research in telecommunications.

ACHIEVEMENTS

- Improved network service quality by 25% through AI-driven optimization initiatives.
- Recognized as 'Employee of the Year' for outstanding contributions to AI projects.
- Successfully launched an AI model that reduced operational costs by $1 million annually.
