#### SKILLS

- Machine Learning
- Algorithmic Trading
- Python
- R
- Data Analysis
- Risk Management

#### LANGUAGES

- English
- Spanish
- French

#### EDUCATION

**BACHELOR OF SCIENCE IN FINANCIAL ENGINEERING, NEW YORK UNIVERSITY**

#### ACHIEVEMENTS

- Successfully increased portfolio returns by 30% through innovative AI trading strategies.
- Named 'Employee of the Year' for outstanding contributions to algorithm development.
- Published articles on AI applications in finance in leading finance journals.

#### WORK EXPERIENCE

##### AI RESEARCH ENGINEER

FinTech Solutions

2020 - 2025

- Developed algorithmic trading strategies using machine learning that increased returns by 30%.
- Utilized big data technologies to analyze market conditions and optimize trading algorithms.
- Collaborated with quantitative analysts to refine models and enhance accuracy.
- Conducted thorough backtesting of algorithms to validate performance before deployment.
- Created visualizations to communicate complex data findings to stakeholders.
- Participated in risk assessment projects to identify and mitigate potential losses.

##### QUANTITATIVE ANALYST

Market Analytics Group

2015 - 2020

- Researched and implemented predictive models for market forecasting.
- Analyzed large datasets to identify patterns and inform investment strategies.
- Worked with finance teams to develop data-driven reports for stakeholders.
- Utilized R and Python for statistical analysis and model building.
- Designed dashboards to track performance metrics of trading strategies.
- Contributed to the development of risk management frameworks.
