- French

EDUCATION

BACHELOR OF SCIENCE IN COMPUTER ENGINEERING, TECH UNIVERSITY

ACHIEVEMENTS

- Played a key role in launching an AI product that received industry recognition.
- Received a 'Star Performer' award for outstanding contributions to the QA team.
- Improved regression testing efficiency by 25% through automation.

AI TESTING ENGINEER

I am a results-oriented AI Testing Engineer with seven years of experience in the technology sector, specializing in testing AI-driven applications. My expertise lies in ensuring product quality through meticulous testing and validation processes. I have successfully led testing efforts for several high-stakes projects, working closely with developers and stakeholders to meet project deadlines and quality standards.

WORK EXPERIENCE

AI TESTING ENGINEER
NextGen AI Solutions
2020 - 2025

- Conducted comprehensive testing of AI applications to ensure functionality and performance.
- Developed automated test scripts using C# and SpecFlow for regression testing.
- Collaborated with software engineers to troubleshoot and resolve issues effectively.
- Implemented performance benchmarks to evaluate system efficiency.
- Documented defects and testing outcomes for review by stakeholders.
- Enhanced testing processes, leading to a 30% reduction in testing time.

SOFTWARE TEST ENGINEER
Digital Innovations LLC
2015 - 2020

- Participated in the testing cycle of AI products, including unit and integration testing.
- Created detailed test plans and test cases based on project requirements.
- Collaborated with product managers to define testing requirements and success metrics.
- Engaged in peer reviews to enhance testing documentation quality.
- Utilized JIRA for defect tracking and reporting.
- Achieved 90% defect identification rate during testing phases.
