### EDUCATION

#### BACHELOR OF SCIENCE IN PUBLIC HEALTH, STATE UNIVERSITY

### ACHIEVEMENTS

- Contributed to a published study that received recognition at the National Public Health Conference.
- Implemented a community initiative that increased health service usage by 30% among target populations.
- Recipient of the Outstanding Student Research Award in 2017.

### PROFILE

Enthusiastic and detail-oriented Allied Health Researcher with 5 years of experience specializing in health services research. I have a strong passion for improving healthcare delivery through rigorous analysis and research methodologies. My background includes working with community health organizations to assess the impact of health interventions on underserved populations.

### EXPERIENCE

#### HEALTH RESEARCH ANALYST

##### Community Health Network

2016 - Present

- Conducted assessments of community health programs to evaluate effectiveness and identify areas for improvement.
- Developed surveys and interview guides to gather qualitative data from program participants.
- Analyzed data using SPSS to inform local health policy decisions.
- Collaborated with local organizations to promote research findings and enhance community outreach.
- Presented data-driven insights to stakeholders, leading to the implementation of new health initiatives.
- Managed project timelines and coordinated activities among cross-functional teams.

#### RESEARCH INTERN

##### Global Health Research Institute

2014 - 2016

- Assisted in the design and execution of a study on health disparities in rural communities.
- Collected and organized data from various sources, ensuring accuracy and reliability.
- Collaborated with senior researchers to analyze qualitative data from focus groups.
- Drafted reports and presented findings to the research team and external partners.
- Participated in community engagement efforts to disseminate research results.
- Supported grant writing efforts, contributing to funding proposals for future research.
