- San Francisco, CA

### SKILLS

- Product design
- CAD modeling
- Client engagement
- Fabrication techniques
- Market analysis
- Sustainability practices

### LANGUAGES

- English
- Spanish
- French

### EDUCATION

**BACHELOR OF ARTS IN PRODUCT DESIGN, DESIGN SCHOOL OF TECHNOLOGY**

### ACHIEVEMENTS

- Led a project that resulted in a 40% reduction in material waste.
- Received client accolades for outstanding design innovation.
- Implemented a new CAD system that improved design accuracy.

### WORK EXPERIENCE

#### ALUMINIUM DESIGN ENGINEER

Innovative Aluminium Designs

2020 - 2025

- Designed custom aluminium products tailored to client specifications.
- Utilized CAD software for precise design and modeling.
- Collaborated with production teams to ensure design feasibility.
- Conducted market research to inform design trends and client preferences.
- Responsible for project documentation and reporting.
- Engaged with clients throughout the design process to refine concepts.

#### ALUMINIUM FABRICATION TECHNICIAN

Quality Metalworks

2015 - 2020

- Fabricated aluminium components using various tools and techniques.
- Monitored production quality and maintained detailed records.
- Participated in team meetings to discuss project progress and challenges.
- Assisted in the training of new technicians on fabrication methods.
- Ensured compliance with environmental and safety regulations.
- Provided input on process improvements to enhance efficiency.
