Proactive Analytics Operations Analyst with 3 years of experience in the logistics and supply chain industry. Specializes in leveraging analytics to optimize supply chain operations and improve delivery performance. Strong skills in data analysis and visualization tools to present findings to stakeholders effectively. Experienced in working with cross-functional teams to drive data initiatives that enhance operational efficiencies.

💼 WORK EXPERIENCE

Supply Chain Analyst
2020-2023

Logistics Solutions Inc.

- Analyzed supply chain data to identify inefficiencies and recommended process improvements.
- Developed dashboards for real-time tracking of logistics KPIs, improving visibility for management.
- Worked closely with vendors to optimize inventory levels and reduce stockouts.
- Utilized SQL to extract and analyze data from various supply chain systems.
- Conducted training for staff on analytics tools and data reporting best practices.
- Collaborated with operational teams to align analytics efforts with supply chain goals.

Data Analyst Intern
2019-2020

Transport Analytics Group

- Supported data analysis projects focused on transportation efficiencies and cost reductions.
- Assisted in the development of reports that summarized logistics performance metrics.
- Participated in meetings with supply chain teams to align analytics initiatives with operational needs.
- Contributed to the implementation of data visualization tools for enhanced reporting.
- Maintained documentation of data sources and analytical methodologies used in projects.
- Conducted research on best practices in supply chain analytics to support team efforts.

★ ACHIEVEMENTS

- Identified and implemented process improvements that reduced logistics costs by 10%.
- Recognized for outstanding contributions to supply chain optimization projects.
- Developed a reporting tool that improved data accuracy and reporting efficiency by 30%.
