- participatory methods
- qualitative analysis
- community engagement
- sustainable development
- cultural advocacy

LANGUAGES

- English
- Spanish
- French

EDUCATION

MASTER'S IN ENVIRONMENTAL ANTHROPOLOGY, UNIVERSITY OF OREGON

ACHIEVEMENTS

- Developed a community-led project that improved local waste management practices, reducing waste by 25%.
- Recognized by the Environmental Justice Coalition for outstanding contributions to community sustainability.
- Published a peer-reviewed article on the role of culture in environmental stewardship.

Passionate anthropologist with 5 years of experience focused on environmental anthropology. My research investigates the relationship between cultural practices and environmental sustainability. I have worked with indigenous communities to document traditional ecological knowledge and advocate for its integration into modern environmental policies. I excel in participatory research methods, ensuring that community voices are central to environmental decision-making.

WORK EXPERIENCE

ENVIRONMENTAL ANTHROPOLOGIST

EcoCulture Initiative
2020 - 2025

- Conducted field studies to understand indigenous ecological practices and their relevance today.
- Collaborated with environmental organizations to promote culturally appropriate conservation strategies.
- Facilitated workshops for communities to share traditional ecological knowledge.
- Analyzed data to assess the impacts of environmental policies on local cultures.
- Published research findings that informed environmental advocacy efforts.
- Presented at conferences, raising awareness about the intersection of culture and environmental sustainability.

RESEARCH ASSISTANT

Sustainable Futures Research Group
2015 - 2020

- Assisted in research projects examining the cultural dimensions of climate change.
- Conducted interviews with community members to gather qualitative insights on environmental issues.
- Contributed to reports that highlighted the significance of indigenous knowledge in climate adaptation strategies.
- Organized community engagement events to promote dialogue on sustainability.
- Supported grant applications that secured funding for research initiatives.
- Worked collaboratively with a multidisciplinary team to develop educational materials.
