EDUCATION

MASTER OF SCIENCE IN SOFTWARE ENGINEERING, FINANCIAL UNIVERSITY, 2015

ACHIEVEMENTS

- Improved application efficiency by 40% through optimization techniques.
- Recognized for outstanding leadership in project management by the executive team.
- Successfully led the migration of legacy systems to modern architectures.

PROFILE

Experienced Application Developer with a solid foundation in software engineering principles and over 8 years of experience in the finance sector. Expertise in designing and implementing complex applications that enhance operational efficiency and data accuracy. Strong background in working with financial databases and compliance regulations, ensuring that all applications meet industry standards.

EXPERIENCE

SOFTWARE ENGINEER

FinanceCorp Solutions

2016 - Present

- Designed and developed applications for financial data analysis using C# and .NET.
- Integrated third-party APIs to enhance functionality of existing applications.
- Conducted performance tuning and optimization for database queries.
- Worked closely with the compliance team to ensure all applications were compliant with financial regulations.
- Participated in peer reviews to maintain code quality and share knowledge.
- Documented application features and workflows for future reference and training.

SENIOR APPLICATION DEVELOPER

WealthTech Innovations

2014 - 2016

- Led a team of developers in creating a mobile application for investment tracking.
- Utilized React Native to build cross-platform applications, increasing user engagement by 50%.
- Implemented automated testing procedures, reducing bugs in production by 25%.
- Analyzed user feedback to continuously enhance application features and usability.
- Managed project timelines and deliverables, ensuring projects were completed on schedule.
- Provided training sessions for junior developers on best coding practices.
