EDUCATION

BACHELOR OF SCIENCE IN SOFTWARE ENGINEERING, STATE UNIVERSITY, 2012

ACHIEVEMENTS

- Increased patient data retrieval speed by 40% through optimized database queries.
- Received the 'Innovation Award' for developing a telehealth solution during the pandemic.
- Played a key role in achieving 98% user satisfaction rating for software usability.

PROFILE

With a decade of experience as an Application Programmer specializing in healthcare technology, I have developed applications that enhance patient care and streamline hospital operations. My expertise lies in integrating various health information systems, ensuring compliance with healthcare regulations, and improving data interoperability. Throughout my career, I have worked closely with healthcare professionals to understand their needs and translate them into functional applications.

EXPERIENCE

SENIOR APPLICATION PROGRAMMER

HealthFirst Solutions

2016 - Present

- Developed and maintained EHR systems that improved data accuracy by 25%.
- Worked with cross-functional teams to gather requirements and deliver software solutions that meet regulatory standards.
- Integrated APIs from various healthcare systems to enhance data sharing capabilities.
- Led training sessions for healthcare staff on new software functionalities.
- Implemented security measures to protect sensitive patient information in compliance with HIPAA.
- Analyzed user feedback to iterate on application features and improve usability.

APPLICATION PROGRAMMER

MediTech Innovations

2014 - 2016

- Designed patient management applications that reduced appointment scheduling errors by 20%.
- Collaborated with UX designers to develop intuitive interfaces for end-users.
- Utilized Agile methodologies to enhance project delivery timelines.
- Conducted performance testing and optimization for high-traffic applications.
- Documented software development processes and created user manuals.
- Participated in code reviews to maintain coding standards and best practices.
