- German

ACHIEVEMENTS

- Increased production output by 20% through software optimization initiatives.
- Led a project that saved the company $100,000 annually by streamlining operations.
- Received recognition for outstanding contributions to software development projects.

I am a results-driven Application Programmer with over 8 years of experience in developing enterprise-level applications for the manufacturing industry. My expertise lies in creating custom software solutions that improve operational efficiency and reduce production downtime. I have a solid understanding of manufacturing processes and how technology can support them.

EXPERIENCE

LEAD APPLICATION DEVELOPER

ManufactureTech Corp

2016 - Present

- Designed and implemented custom ERP systems that improved production efficiency by 30%.
- Collaborated with engineering teams to develop software that monitors equipment performance in real-time.
- Utilized data analytics to identify and address production bottlenecks.
- Managed a team of developers to deliver high-quality software solutions on time.
- Conducted user training sessions to ensure effective software adoption.
- Maintained documentation of software development processes and updates.

APPLICATION PROGRAMMER

Precision Manufacturing Solutions

2014 - 2016

- Developed software applications to track inventory levels and automate reordering processes.
- Worked with cross-functional teams to gather requirements and deliver tailored software solutions.
- Implemented quality control features that reduced defects by 15%.
- Analyzed user feedback to enhance application features and usability.
- Participated in Agile development cycles, contributing to continuous improvement.
- Created training materials and user guides for new software functionalities.
