- (555) 234-5678
- michael.anderson@email.com
- San Francisco, CA

### SKILLS

- Penetration testing
- Risk analysis
- Security audits
- CI/CD
- Vulnerability scanning
- Secure coding

### LANGUAGES

- English
- Spanish
- French

### EDUCATION

MASTER OF SCIENCE IN INFORMATION SECURITY, CYBER UNIVERSITY, 2016

### ACHIEVEMENTS

- Successfully reduced application vulnerabilities by 40% through targeted security initiatives.
- Developed a security training program that improved developer compliance with security guidelines by 30%.
- Recognized for excellence in client service at CyberGuard Solutions.

### PROFILE

Results-driven Application Security Engineer with 5 years of specialized experience in web application security. I have a robust background in identifying security vulnerabilities and implementing effective remediation strategies. My journey began with a focus on software development, which provided me with a solid foundation in coding principles. Transitioning into security, I have honed my skills in penetration testing, security assessments, and risk analysis.

### EXPERIENCE

#### APPLICATION SECURITY ENGINEER

##### Global Tech Corp.

2016 - Present

- Performed regular security audits on web applications, identifying vulnerabilities that could be exploited.
- Developed automated scripts to enhance the efficiency of security scanning processes.
- Collaborated with development teams to integrate security tools within the CI/CD pipeline.
- Conducted training sessions for developers on secure coding techniques, improving code quality.
- Utilized tools like Burp Suite and OWASP ZAP for penetration testing and vulnerability assessments.
- Drafted comprehensive reports detailing security findings and recommendations for improvements.

#### SECURITY CONSULTANT

##### CyberGuard Solutions

2014 - 2016

- Assisted clients in identifying application security risks and developing remediation plans.
- Conducted workshops on the importance of application security best practices.
- Reviewed and assessed third-party software for compliance with security standards.
- Implemented security measures that resulted in a 20% decrease in vulnerabilities across client applications.
- Maintained detailed documentation of security assessments and compliance reports.
- Provided ongoing support and consultation for security-related inquiries.
