## SKILLS

- Penetration testing
- Vulnerability assessments
- Risk analysis
- Security documentation
- Agile methodologies
- Incident response

## EDUCATION

**BACHELOR OF SCIENCE IN  
CYBERSECURITY, TECH UNIVERSITY,  
2018**

## LANGUAGE

- English
- Spanish
- German

## ACHIEVEMENTS

- Recognized for outstanding performance in application security assessments.
- Developed a security training program that improved developer compliance by 25%.
- Played a key role in reducing security incidents by 30% through proactive measures.

# Michael Anderson

## APPLICATION SECURITY ENGINEER

Detail-oriented Application Security Engineer with 4 years of experience in securing web applications. My career began in IT support, where I gained foundational knowledge of systems and networks. I then transitioned to application security, focusing on identifying vulnerabilities and implementing security solutions. My experience includes performing penetration testing, vulnerability assessments, and risk analysis for various applications.

## EXPERIENCE

### APPLICATION SECURITY ENGINEER

WebSecure Technologies

2016 - Present

- Conducted penetration tests on web applications, identifying critical vulnerabilities and providing remediation guidance.
- Developed security testing plans to assess the effectiveness of security controls.
- Collaborated with development teams to integrate security into agile development practices.
- Utilized tools such as Nessus and Fortify for vulnerability scanning and analysis.
- Generated detailed reports outlining security findings and actionable recommendations.
- Participated in security incident response teams to mitigate security breaches.

### SECURITY ANALYST

InfoSec Solutions

2014 - 2016

- Assisted in performing risk assessments and vulnerability analyses on client applications.
- Maintained security documentation and compliance reports for various projects.
- Conducted training sessions to educate staff on security best practices.
- Monitored application security alerts and provided timely responses to incidents.
- Evaluated third-party software for security compliance.
- Supported the development of security policies and procedures to enhance application security.
