MICHAEL ANDERSON

AQUACULTURE BIOSECURITY MANAGER

Strategic Aquaculture Disease Control Specialist possessing a robust background in fish health management and biosecurity measures across diverse aquaculture operations. Expertise encompasses the assessment of disease risks and the formulation of effective management protocols tailored to regional aquaculture practices. Demonstrated ability to lead teams in the implementation of advanced diagnostics and treatment options, resulting in enhanced farm productivity and sustainability.

PROFESSIONAL EXPERIENCE

Sustainable Fish Farming Inc.

Mar 2018 - Present

Aquaculture Biosecurity Manager

- Developed and executed biosecurity plans to prevent disease outbreaks in aquaculture facilities.
- Conducted regular audits of biosecurity measures and recommended improvements.
- Trained staff on best practices for disease prevention and biosecurity protocols.
- Analyzed disease data to inform strategic decision-making for farm operations.
- Collaborated with external partners to enhance knowledge sharing and resource utilization.
- Oversaw compliance with local and international aquaculture regulations.

Aquatic Health Services

Dec 2015 - Jan 2018

Field Veterinary Technician

- Provided on-site veterinary support for disease diagnosis and treatment in aquaculture.
- Assisted in the development of health management plans for various species.
- Monitored fish health and reported findings to senior veterinary staff.
- Implemented vaccination programs to enhance fish immunity against prevalent diseases.
- Coordinated with farm managers to ensure adherence to health protocols.
- Participated in community outreach initiatives to educate local aquaculturists.

ACHIEVEMENTS

- Achieved a 25% reduction in disease outbreaks through the implementation of new biosecurity measures.
- Recognized for excellence in training programs by industry peers.
- Successfully led a project that improved fish growth rates by 15% through health management initiatives.
