SKILLS

- Pathogen detection
- Research methodologies
- Stakeholder engagement
- Training development
- Data presentation
- Compliance monitoring

LANGUAGES

- English
- Spanish
- French

EDUCATION

**MASTER OF SCIENCE IN AQUATIC
BIOLOGY, UNIVERSITY OF MIAMI**

ACHIEVEMENTS

- Secured over \$500,000 in research funding through successful grant proposals.
- Authored 8 influential papers in leading scientific journals.
- Received the 'Excellence in Research Award' for contributions to aquatic health studies.

WORK EXPERIENCE

Innovative Aquaculture Disease Control Specialist with a strong focus on research-driven approaches to disease management in aquaculture systems. Recognized for expertise in employing cutting-edge technologies for pathogen detection and analysis. Proven ability to drive improvements in aquaculture health by developing targeted intervention strategies that enhance fish welfare and productivity. Strong communication skills facilitate effective collaboration with researchers, producers, and regulatory bodies.

LEAD AQUATIC HEALTH RESEARCHER

Center for Aquatic Innovations

2020 - 2025

- Designed and conducted research studies aimed at understanding disease dynamics in aquaculture.
- Utilized next-generation sequencing technologies for pathogen identification.
- Collaborated with industry stakeholders to translate research findings into practical applications.
- Published research outcomes in peer-reviewed journals to disseminate knowledge.
- Presented findings at international symposia to foster collaboration.
- Developed training modules based on research insights for aquaculture professionals.

AQUATIC HEALTH CONSULTANT

Fish Health Alliance

2015 - 2020

- Provided expert consultations on disease management strategies for aquaculture operations.
- Conducted site assessments to identify potential health risks.
- Developed customized health management plans for diverse aquaculture environments.
- Facilitated workshops to educate producers on emerging health threats.
- Collaborated with regulatory agencies to ensure compliance with health standards.
- Monitored and reported on the effectiveness of implemented health strategies.
