

MICHAEL ANDERSON

LEAD NUTRITION SCIENTIST

PROFILE

Strategic Aquaculture Nutrition Specialist with a strong focus on developing sustainable feed solutions that align with environmental stewardship and economic viability. Expertise in the integration of cutting-edge nutritional science with practical applications in aquaculture settings. Proven ability to lead multidisciplinary teams in pioneering research projects that enhance fish growth and health while minimizing ecological impact.

EXPERIENCE

LEAD NUTRITION SCIENTIST

Sustainable Feed Technologies

2016 - Present

- Led research initiatives to develop plant-based feed formulations for aquaculture.
- Evaluated the nutritional profiles of alternative ingredients for incorporation into feeds.
- Implemented a sustainable sourcing program for raw materials.
- Collaborated with regulatory bodies to ensure compliance with feed safety standards.
- Presented research outcomes to stakeholders, influencing industry practices.
- Mentored junior scientists in nutritional research methodologies.

AQUACULTURE FEED DEVELOPMENT SPECIALIST

Aquatic Innovations Inc.

2014 - 2016

- Developed and tested innovative feed formulations that improved growth rates.
- Conducted sensory evaluations to assess feed palatability among different species.
- Collaborated with aquaculture farms to refine feeding protocols based on nutritional research.
- Analyzed market trends to identify opportunities for product development.
- Participated in industry workshops to share knowledge on sustainable practices.
- Authored technical reports summarizing research findings for internal stakeholders.

- San Francisco, CA

SKILLS

- Sustainable Feed Development
- Nutritional Science
- Regulatory Compliance
- Research Leadership
- Data Interpretation
- Stakeholder Engagement

LANGUAGES

- English
- Spanish
- French

EDUCATION

MASTER OF SCIENCE IN AQUACULTURE, COASTAL UNIVERSITY

ACHIEVEMENTS

- Increased feed efficiency by 15% through innovative product development.
- Received the 'Sustainability Award' for contributions to eco-friendly feed solutions.
- Published multiple articles in leading aquaculture journals on nutrition advancements.
