

MICHAEL ANDERSON

AQUACULTURE PROJECT MANAGER

PROFILE

Dynamic Aquaculture Technologist with extensive experience in freshwater and marine aquaculture systems. Specializes in the development and implementation of innovative farming techniques that enhance productivity while prioritizing ecological sustainability. A proven leader in managing aquaculture projects from inception to execution, ensuring adherence to best practices and regulatory standards. Demonstrated ability to analyze environmental impacts and implement corrective measures to mitigate risks associated with fish farming.

EXPERIENCE

AQUACULTURE PROJECT MANAGER

Green Waters Aquaculture

2016 - Present

- Managed multiple aquaculture projects, achieving a 30% increase in production efficiency.
- Oversaw the installation of automated feeding systems, reducing labor costs.
- Established partnerships with local communities to promote sustainable practices.
