

Michael ANDERSON

AQUACULTURE TECHNOLOGY MANAGER

Innovative Aquatic Farming Specialist with a robust background in technology integration within aquaculture, offering over 9 years of experience in enhancing farming practices through digital solutions. Expertise in utilizing IoT and data analytics to monitor farm conditions, optimize feed use, and improve overall productivity. A forward-thinking professional skilled in project management, capable of leading cross-functional teams to implement cutting-edge farming technologies.

SKILLS

- Aquaculture Technology
- IoT Integration
- Data Analytics
- Project Management
- Sustainable Practices
- Stakeholder Communication

LANGUAGES

- English
- Spanish
- French

EDUCATION

**M.S. IN AQUACULTURE TECHNOLOGY,
UNIVERSITY OF ILLINOIS, 2014**

ACHIEVEMENTS

- Increased farm productivity by 25% through technology integration.
- Developed a patented technology for automated feeding systems.
- Recognized as 'Innovator of the Year' by the Aquaculture Technology Association in 2022.

WORK EXPERIENCE

AQUACULTURE TECHNOLOGY MANAGER

SmartAquaculture Systems

2020 - 2025

- Managed the integration of IoT systems for real-time monitoring of aquaculture environments.
- Led a team in developing software solutions to improve farm management efficiency.
- Analyzed data trends to inform decision-making and enhance productivity.
- Trained staff on new technologies and best practices in aquaculture.
- Collaborated with external vendors to source innovative equipment and technologies.
- Presented technology proposals to stakeholders, securing funding for new initiatives.

AQUACULTURE SYSTEMS ANALYST

TechFish Corp.

2015 - 2020

- Conducted data analysis to optimize feed efficiency and reduce waste.
- Developed predictive models to forecast production outcomes based on environmental variables.
- Collaborated with research teams to assess the impact of technology on fish health.
- Participated in workshops to educate stakeholders on technology benefits in aquaculture.
- Maintained documentation for technology implementation and best practices.
- Engaged with farmers to gather feedback on technology use and effectiveness.
