MICHAEL ANDERSON

ARTIFICIAL INSEMINATION TECHNICIAN

An experienced Artificial Insemination Technician with over 8 years of expertise in small ruminant reproduction, particularly sheep and goats. Proficient in applying advanced reproductive techniques to improve breeding efficiency and genetic quality within herds. Skilled in performing artificial insemination, embryo transfer, and reproductive health assessments. Strong collaborator with livestock producers and veterinarians, ensuring the implementation of best practices in animal breeding.

PROFESSIONAL EXPERIENCE

Ruminant Reproductive Services

Mar 2018 - Present

Artificial Insemination Technician

- Performed artificial insemination on over 400 ewes and does annually.
- Executed embryo transfer procedures to enhance genetic diversity.
- Conducted reproductive health evaluations and developed management plans.
- Trained farm personnel on artificial insemination techniques.
- Maintained accurate breeding records and reproductive data.
- Collaborated with veterinarians to ensure herd health protocols.

Heritage Farms

Dec 2015 - Jan 2018

Reproductive Technician

- Assisted in artificial insemination and synchronization protocols.
- Monitored health and nutrition of breeding animals.
- Participated in workshops to stay current on reproductive technologies.
- Maintained biosecurity measures during breeding seasons.
- Documented breeding outcomes and reported to farm management.
- Supported veterinary staff in health assessments and treatments.

ACHIEVEMENTS

- Increased lambing and kidding rates by 25% through improved breeding practices.
- Recognized for outstanding contribution to herd management in 2020.
- Developed a training manual for new technicians, enhancing operational efficiency.
