

MICHAEL ANDERSON

Software Engineering Instructor

As a passionate Artificial Intelligence Educator with a focus on software engineering, I bring over 9 years of experience in teaching AI concepts to budding software developers. I began my career as a software engineer, where I realized the pivotal role of AI technologies in enhancing software development processes.

WORK EXPERIENCE

Software Engineering Instructor 2020-2023

Code Academy

- Taught AI and machine learning concepts to software engineering students.
- Developed coding exercises focused on real-world AI applications.
- Facilitated group projects to design AI-powered software solutions.
- Collaborated with industry partners to ensure curriculum relevance.
- Mentored students in coding competitions with AI focus.
- Presented at tech meetups on the future of AI in software engineering.

AI Curriculum Consultant 2019-2020

Tech Innovations Inc.

- Developed AI curriculum for software engineering bootcamps.
- Created assessment tools to evaluate student understanding of AI concepts.
- Conducted workshops on the integration of AI into software development.
- Collaborated with educators to enhance teaching strategies for AI.
- Evaluated program success through student performance metrics.
- Published articles on AI in software engineering education.

ACHIEVEMENTS

- Helped students secure internships in top tech companies through mentorship.
- Received the 'Best Teaching Award' for outstanding AI instruction.
- Contributed to the development of an AI course adopted by several universities.
