- French

## WORK EXPERIENCE

### Technology Integration Officer

2020-2023

U.S. Army

- Evaluated and implemented new artillery technologies to improve operational capabilities.
- Conducted training sessions on advanced artillery systems for personnel.
- Collaborated with research and development teams to assess emerging technologies.
- Analyzed performance data to enhance artillery effectiveness.
- Led initiatives to modernize existing artillery equipment and systems.
- Maintained documentation for technology integration processes and outcomes.

### Artillery Operations Officer

2019-2020

U.S. Army

- Managed artillery operations during combat, ensuring effective fire support.
- Developed fire plans that integrated new technologies for improved targeting.
- Conducted assessments of artillery performance and recommended enhancements.
- Trained soldiers on the use of new artillery systems and technologies.
- Coordinated with intelligence to optimize artillery deployment strategies.
- Participated in after-action reviews to improve future operational effectiveness.

## ACHIEVEMENTS

- Received the Army Commendation Medal for successful technology integration in artillery operations.
- Led a project that resulted in a 30% increase in artillery effectiveness through modernization.
- Recognized as a top innovator in the division for contributions to artillery technology advancements.
