

MICHAEL ANDERSON

AUTOMATION TEST ENGINEER

PROFILE

Dynamic and detail-oriented Automation Engineer with over 5 years of experience in the IT sector focusing on test automation and continuous integration. Proficient in using tools like Selenium and TestNG to enhance software quality and reduce release times. I have a strong analytical mindset, allowing me to identify process inefficiencies and develop automated solutions that align with business objectives.

EXPERIENCE

AUTOMATION TEST ENGINEER

NextGen Software Solutions

2016 - Present

- Developed automated test scripts using Selenium, increasing test coverage by 50%.
- Implemented continuous integration pipelines using Jenkins, reducing deployment time by 30%.
- Collaborated with QA teams to identify and resolve defects in software applications.
- Created comprehensive test documentation and reports for stakeholder review.
- Participated in agile ceremonies to provide insights on automation progress.
- Trained junior team members on automation best practices and tools.

JUNIOR AUTOMATION ENGINEER

Innovative Tech Corp

2014 - 2016

- Assisted in the development of automated testing solutions for web applications.
- Conducted manual testing to complement automated processes and ensure comprehensive coverage.
- Maintained and updated existing automation frameworks to adapt to new project requirements.
- Collaborated with developers to optimize test cases for better performance.
- Supported troubleshooting efforts for automation failures and provided timely resolutions.
- Documented automation processes and contributed to knowledge sharing within the team.
