MICHAEL ANDERSON

AUTOMATION QUALITY ENGINEER

An experienced Automation Quality Engineer specializing in the development and execution of automated testing solutions for enterprise applications. With over 12 years of experience in the software development lifecycle, this professional excels in identifying testing needs and implementing effective automated strategies that enhance product quality. Proven ability to collaborate with software development teams to ensure the seamless integration of testing processes into the development workflow.

PROFESSIONAL EXPERIENCE

NextGen Systems   *Mar 2018 - Present*
Automation Quality Engineer

- Designed and executed automated tests using Selenium and C# for web applications.
- Collaborated with product owners to define test scenarios and acceptance criteria.
- Implemented test automation frameworks that improved testing efficiency.
- Conducted performance testing using LoadRunner to assess application scalability.
- Reviewed and improved existing test cases to enhance coverage and effectiveness.
- Trained new team members on automation tools and best practices.

Digital Solutions Corp.   *Dec 2015 - Jan 2018*
Software Quality Analyst

- Executed manual and automated tests to ensure software quality prior to release.
- Developed and maintained test scripts in Python for automated regression testing.
- Participated in Agile ceremonies to align testing efforts with development iterations.
- Identified defects and ensured proper documentation for resolution tracking.
- Provided insights on software usability and performance improvements.
- Managed test environments and configurations to ensure accurate testing.

ACHIEVEMENTS

- Increased test automation coverage by 50% within one year.
- Received the 'Quality Champion' award for exceptional contributions to project quality.
- Reduced bug rate in production by 30% through effective testing strategies.
