

MICHAEL ANDERSON

Senior Automation Testing Engineer

- San Francisco, CA
- (555) 234-5678
- michael.anderson@email.com

A strategic Automation Testing Engineer with over 10 years of experience in the automotive industry, specializing in the automation of testing processes for complex vehicle software systems. Extensive background in developing and executing automated test plans that ensure compliance with safety and performance standards. Proficient in utilizing a range of automation tools including Selenium, QTP, and LoadRunner.

WORK EXPERIENCE

Senior Automation Testing Engineer | Automotive Solutions Inc.

Jan 2022 – Present

- Led the automation testing efforts for vehicle software systems using Selenium and QTP.
- Developed comprehensive test plans and executed test cases in compliance with industry standards.
- Collaborated with engineering teams to identify and mitigate risks in software releases.
- Utilized LoadRunner for performance testing of complex systems.
- Provided training and mentorship to junior engineers on automation best practices.
- Maintained detailed documentation of testing processes and results.

Automation Engineer | Vehicle Innovations Ltd.

Jul 2019 – Dec 2021

- Executed automated test cases for various vehicle software applications.
- Participated in requirement analysis to ensure testability.
- Utilized JIRA for defect tracking and management.
- Conducted regression testing following software updates.
- Analyzed test results and communicated findings to stakeholders.
- Assisted in continuous improvement initiatives for testing practices.

SKILLS

Selenium QTP LoadRunner JIRA Agile Test Automation

EDUCATION

Bachelor of Science in Automotive Engineering

2012

College of Engineering

ACHIEVEMENTS

- Achieved a 95% defect-free rate on major software releases.
- Recognized for leadership in automating complex testing scenarios.
- Successfully led a project that reduced testing time by 30%.
