EXPERTISE SKILLS

- Automation Validation
- Automotive Engineering
- ISO Standards
- Project Management
- Data Analysis
- Continuous Improvement

LANGUAGES

- English
- Spanish
- French

CERTIFICATION

- Bachelor of Science in Mechanical Engineering, Automotive University

MICHAEL ANDERSON

LEAD AUTOMATION VALIDATION ENGINEER

A highly skilled Automation Validation Engineer with over 12 years of experience in the automotive industry, specializing in the validation of automated testing systems. Possesses a robust understanding of automotive standards and regulations, ensuring that all validation procedures meet or exceed compliance requirements. Expertise in developing and executing validation strategies that enhance product reliability and performance.

PROFESSIONAL EXPERIENCE

AutoMation Corp.   *Mar 2018 - Present*
Lead Automation Validation Engineer

- Oversaw validation of automated testing systems for vehicle components.
- Developed and executed comprehensive validation plans in compliance with ISO standards.
- Coordinated with cross-functional teams to ensure timely project delivery.
- Implemented new validation methodologies that improved testing accuracy.
- Trained staff on validation best practices and regulatory requirements.
- Managed validation documentation to ensure compliance with industry standards.

DriveTech Solutions   *Dec 2015 - Jan 2018*
Automation Validation Engineer

- Conducted validation of automated testing equipment for automotive applications.
- Performed data analysis to evaluate system performance and reliability.
- Maintained compliance with safety and quality standards throughout validation processes.
- Collaborated with engineering teams to identify and resolve validation issues.
- Documented validation processes and outcomes for internal audits.
- Participated in continuous improvement initiatives to enhance validation efficiency.

ACHIEVEMENTS

- Increased testing efficiency by 40% through the implementation of automated systems.
- Awarded 'Best Innovator' for contributions to automation technologies in automotive testing.
- Successfully led a project that resulted in a 30% reduction in validation costs.
