A dedicated Automotive Manufacturing Engineer with over 9 years of experience in developing and optimizing manufacturing processes in the automotive sector. Known for a strong ability to integrate innovative technologies into production workflows to enhance efficiency and reduce costs. Proficient in project management, with a focus on delivering high-quality results within tight deadlines.

SKILLS

- Process Development
- Automation
- Project Management
- Data Analysis
- Team Collaboration
- Manufacturing Technologies

EDUCATION

BACHELOR OF SCIENCE IN INDUSTRIAL ENGINEERING, PURDUE UNIVERSITY

LANGUAGE

- English
- Spanish
- German

ACHIEVEMENTS

- Led a project that enhanced production efficiency by 20%.
- Received recognition for outstanding contributions to process development.
- Successfully implemented a new ERP system that improved data accuracy.

EXPERIENCE

PROCESS DEVELOPMENT ENGINEER

Future Auto Corp.

2016 - Present

- Designed and optimized manufacturing processes for new vehicle platforms.
- Implemented automation solutions that improved production speed by 15%.
- Conducted feasibility studies for new technologies in manufacturing.
- Collaborated with design engineers to enhance product designs for manufacturability.
- Analyzed production data to identify and resolve bottlenecks.
- Led teams in continuous improvement initiatives that reduced costs by 10%.

MANUFACTURING ENGINEER

AutoWorks Inc.

2014 - 2016

- Supported the transition to new manufacturing technologies in the assembly line.
- Monitored production processes to ensure compliance with quality standards.
- Assisted in the development of training materials for new equipment.
- Participated in cross-functional teams to improve production workflows.
- Documented process changes and maintained accurate records.
- Engaged in problem-solving sessions to address production challenges.
