PROFILE

Dynamic Aviation Planning Analyst with extensive experience in air transport economics and operational efficiency. Renowned for leveraging advanced analytical methodologies and modeling techniques to enhance airport operations and improve service delivery. Expertise in stakeholder management, regulatory compliance, and strategic planning, with a strong commitment to fostering sustainable aviation practices. Proficient in conducting comprehensive market analyses to guide investment strategies and resource allocation.

EXPERIENCE

AVIATION OPERATIONS CONSULTANT

AeroConsult Group

2016 - Present

- Conducted operational assessments to identify inefficiencies and recommend improvements.
- Developed cost-benefit analyses for proposed airport expansions and upgrades.
- Facilitated workshops with stakeholders to enhance collaborative decision-making.
- Utilized simulation software to model air traffic scenarios and optimize flow.
- Monitored compliance with international aviation standards and regulations.
- Provided training and support to airport staff on new operational procedures.

JUNIOR AVIATION ANALYST

FlightPath Analytics

2014 - 2016

- Assisted in the development of airport capacity studies to support planning initiatives.
- Collected and analyzed data on flight operations to identify trends in delays.
- Prepared detailed reports for senior management to inform strategic decisions.
- Participated in the design of tools for real-time data tracking and reporting.
- Collaborated with cross-functional teams on projects aimed at enhancing customer satisfaction.
- Contributed to the creation of a best practices guide for airport operations.
