### ACHIEVEMENTS

- Improved application performance by 20% through optimization.
- Recognized for excellence in teamwork during project development.
- Successfully led a mini-project that enhanced system features.

### PROFILE

Dynamic Backend Developer with 4 years of experience in creating robust applications and services. My background includes working in the healthcare sector, developing systems that improve patient data management and security. I have a solid understanding of both front-end and back-end technologies, enabling me to create cohesive and efficient applications.

### EXPERIENCE

#### BACKEND DEVELOPER

**HealthTech Corp.**

*2016 - Present*

- Developed backend solutions for a patient management system.
- Ensured data security compliance with HIPAA regulations.
- Collaborated with frontend teams to integrate user interfaces.
- Optimized data storage and retrieval processes.
- Implemented unit testing to enhance code reliability.
- Participated in system architecture design meetings.

#### JUNIOR BACKEND DEVELOPER

**Data Solutions Inc.**

*2014 - 2016*

- Assisted in developing APIs for internal applications.
- Supported database management and optimization tasks.
- Documented code and processes for team reference.
- Contributed to team meetings to discuss project updates.
- Conducted testing and debugging of applications.
- Learned and implemented best coding practices.
