I am a Behavioral Insights Scientist with a unique focus on environmental sustainability, bringing over 6 years of experience in applying behavioral science to promote eco-friendly practices. My career has centered on understanding consumer behavior related to environmental issues and designing interventions that encourage sustainable choices. I have collaborated with NGOs and government agencies to develop campaigns aimed at increasing public awareness about sustainability.

WORK EXPERIENCE

Sustainability Behavior Analyst | Green Future Initiative   Jan 2022 – Present

- Developed behavioral interventions that increased community participation in recycling programs by 30%.
- Conducted surveys to identify barriers to sustainable behaviors, informing campaign strategies.
- Collaborated with local governments to implement eco-friendly initiatives based on behavioral research.
- Presented findings at environmental conferences, enhancing awareness of behavioral insights in sustainability.
- Utilized data analytics to track the effectiveness of sustainability campaigns and initiatives.
- Mentored volunteers on sustainable practices and community engagement strategies.

Research Coordinator | Eco-Advocates Inc.   Jul 2019 – Dec 2021

- Conducted research on consumer behaviors related to energy usage, leading to actionable recommendations for reducing consumption.
- Analyzed data from pilot programs aimed at promoting sustainable practices across communities.
- Collaborated with educational institutions to develop programs that teach sustainability concepts.
- Published reports on research findings, contributing to environmental advocacy efforts.
- Facilitated workshops on behavior change strategies for community leaders.
- Developed educational materials to promote understanding of sustainable practices.
