Dedicated Behavioral Science Researcher with a focus on mental health and community well-being. With over 9 years of experience in conducting research on behavioral health interventions, I have developed a strong understanding of the psychological factors influencing mental health outcomes. I excel in designing and implementing studies that evaluate the effectiveness of various interventions aimed at improving mental health services.

WORK EXPERIENCE

Behavioral Health Researcher | Wellness Research Institute   Jan 2022 – Present

- Led research projects evaluating the impact of community mental health programs.
- Designed surveys and conducted interviews with participants to gather qualitative data.
- Analyzed research findings using R, providing insights that informed program development.
- Collaborated with mental health professionals to assess intervention effectiveness.
- Published articles in peer-reviewed journals on behavioral health topics.
- Presented research findings to stakeholders, advocating for improved mental health services.

Research Assistant | Mental Health Foundation   Jul 2019 – Dec 2021

- Supported research initiatives focused on trauma-informed care practices.
- Conducted literature reviews and synthesized findings for research projects.
- Assisted in developing data collection instruments for mental health assessments.
- Engaged in community outreach to promote research participation.
- Co-authored research papers presented at national conferences.
- Participated in workshops to enhance skills in qualitative research methods.

SKILLS

Mental Health Research   Statistical Analysis   R   Community Engagement   Program Evaluation   Communication
