🎓 EDUCATION

Master's in Biomechanics

University of Rehabilitation Sciences
2016-2020

★ SKILLS

- Rehabilitation technology
- Data analysis
- Product development
- Compliance
- Collaboration
- Patient outcomes

🗚 LANGUAGES

- English
- Spanish
- French

Result-oriented Biomechanics Analyst with a specialization in the intersection of biomechanics and rehabilitation technology. Proven expertise in utilizing biomechanical assessments to inform the development of advanced rehabilitation devices and technologies. Strong background in collaborating with healthcare teams to implement innovative solutions that enhance patient recovery processes. A detail-oriented approach to data analysis and product development, ensuring that all rehabilitation technologies meet the highest standards of efficacy and safety.

💼 WORK EXPERIENCE

Rehabilitation Biomechanics Analyst   2020-2023

Rehab Innovations LLC

- Conducted biomechanical evaluations to guide the development of rehabilitation technologies.
- Collaborated with engineers to create adaptive devices for patient use.
- Analyzed patient data to assess device effectiveness and safety.
- Trained healthcare professionals on the use of new technologies.
- Documented clinical outcomes and compliance with safety regulations.
- Participated in multidisciplinary team meetings to enhance product development.

Biomechanics Research Assistant   2019-2020

University of Health and Technology

- Assisted in research on the efficacy of rehabilitation technologies.
- Conducted literature reviews and data analysis.
- Supported the development of grant proposals for funding research.
- Collaborated with faculty on presentations for academic conferences.
- Maintained laboratory equipment and ensured adherence to protocols.
- Contributed to the writing of research articles for publication.

★ ACHIEVEMENTS

- Developed a rehabilitation device that improved patient recovery times by 30%.
- Published 4 articles in reputable journals on rehabilitation technologies.
- Received the Innovator Award for contributions to rehabilitation practices.
