

Michael

ANDERSON

DATA ANALYST

Dedicated Biomedical Data Scientist with 4 years of experience focusing on health informatics and patient data analytics. Strong proficiency in using data to enhance healthcare delivery and improve patient outcomes. Experienced in working with electronic health records (EHR) and health information systems to extract meaningful insights. Committed to leveraging data science techniques to solve healthcare challenges, enhance operational efficiencies, and contribute to research initiatives.

SKILLS

- Health Informatics
- Data Analysis
- EHR Management
- SQL
- Statistical Software

LANGUAGES

- English
- Spanish
- French

EDUCATION

BACHELOR OF SCIENCE IN HEALTH INFORMATICS, UNIVERSITY OF CHICAGO, 2017

ACHIEVEMENTS

- Improved patient satisfaction scores by 15% through enhanced data analysis practices.
- Contributed to a research project that received funding for innovative healthcare solutions.
- Recognized for outstanding contributions to data-driven health initiatives.

WORK EXPERIENCE

DATA ANALYST

Healthcare Data Solutions

2020 - 2025

- Analyzed EHR data to identify trends in patient care and treatment efficacy.
- Collaborated with IT to develop data collection tools that improved accuracy by 20%.
- Utilized SQL and Excel for data cleaning and analysis, streamlining reporting processes.
- Supported clinical teams in understanding data findings and their implications for patient care.
- Developed dashboards to visualize patient data for healthcare providers.
- Participated in quality improvement projects to enhance patient outcomes based on data insights.

RESEARCH ASSISTANT

University Health Center

2015 - 2020

- Assisted in data collection and analysis for research on patient outcomes.
- Utilized statistical software to evaluate health interventions and their effectiveness.
- Conducted literature reviews to support ongoing research projects.
- Maintained databases to ensure compliance with research standards.
- Presented findings to stakeholders, aiding in the development of new health policies.
- Participated in community health initiatives to promote data-driven decision-making.
