

MICHAEL ANDERSON

PRODUCT MANAGER, BIOMEDICAL DEVICES

PROFILE

Accomplished Biomedical Device Specialist with a robust background in the commercialization of cutting-edge medical technologies. Over 8 years of experience in product lifecycle management, encompassing ideation, development, and market introduction of innovative devices. Proven track record in collaborating with stakeholders to align product features with market needs and regulatory requirements. Adept at utilizing market research and user feedback to inform design iterations, enhancing usability and patient satisfaction.

EXPERIENCE

PRODUCT MANAGER, BIOMEDICAL DEVICES

HealthTech Enterprises

2016 - Present

- Directed product development initiatives for a portfolio of surgical devices.
- Conducted market analysis to identify trends and customer needs, informing product strategy.
- Facilitated cross-departmental collaboration to ensure alignment on project objectives.
- Monitored project timelines and budgets, achieving 15% cost savings on product launches.
- Developed marketing materials and training programs for sales teams.
- Engaged with healthcare professionals to gather feedback and refine product offerings.

BIOMEDICAL DEVICE RESEARCH ASSOCIATE

Clinical Innovations Group

2014 - 2016

- Supported research initiatives for the development of diagnostic imaging devices.
- Assisted in the design and execution of laboratory experiments to validate device efficacy.
- Maintained accurate documentation of research findings for regulatory submissions.
- Collaborated with engineers to optimize device prototypes based on experimental results.
- Participated in user testing sessions, gathering qualitative data to inform design decisions.
- Prepared presentations for stakeholders to communicate research progress and outcomes.
