EDUCATION

Master of Science in Biomedical Engineering

State University
2016-2020

SKILLS

- Laboratory Management
- Assay Development
- Regulatory Compliance
- Team Leadership
- Data Analysis
- Quality Improvement

LANGUAGES

- English
- Spanish
- French

Proactive Biomedical Laboratory Scientist with 9 years of experience in clinical research and laboratory management. Expertise in assay development, data analysis, and regulatory compliance. Proven track record of leading teams to achieve high standards of quality in laboratory operations. Strong analytical skills with a focus on enhancing laboratory efficiency and productivity.

💼 WORK EXPERIENCE

Laboratory Manager
2020-2023

Clinical Research Lab

- Oversaw daily laboratory operations, ensuring compliance with regulatory standards.
- Managed a team of 10 scientists and technicians, fostering a collaborative environment.
- Implemented quality management systems that improved lab performance metrics.
- Developed and validated new laboratory protocols, enhancing testing accuracy.
- Collaborated with research teams to design and execute clinical trials.
- Presented findings at national conferences, promoting research advancements.

Biomedical Laboratory Scientist
2019-2020

Research Institute

- Conducted complex biochemical assays and data analysis for research projects.
- Trained and supervised junior staff on laboratory techniques and safety protocols.
- Maintained laboratory compliance with GLP and ISO standards.
- Collaborated with multidisciplinary teams to optimize research methodologies.
- Documented and reported experimental results for internal and external stakeholders.
- Engaged in continuous education to stay abreast of new laboratory technologies.

★ ACHIEVEMENTS

- Successfully led a project that reduced laboratory costs by 25% through process optimization.
- Recognized for excellence in laboratory management and team performance.
- Published multiple research articles in peer-reviewed journals.
