MICHAEL ANDERSON

EPIDEMIOLOGICAL DATA ANALYST

I am a dedicated Biomedical Research Analyst with a focus on public health research, possessing over 4 years of experience in analyzing epidemiological data to identify health trends and inform policy decisions. My strong analytical skills and attention to detail enable me to derive meaningful insights from complex datasets.

PROFESSIONAL EXPERIENCE

State Health Department — Mar 2018 - Present
Epidemiological Data Analyst

- Analyzed large datasets to identify trends in disease outbreaks and public health issues.
- Utilized SAS for statistical analysis and generated reports for state health initiatives.
- Collaborated with public health officials to develop data-driven strategies for disease prevention.
- Presented findings at community health forums, promoting public awareness.
- Developed training materials for healthcare workers on data reporting procedures.
- Contributed to the publication of the annual state health report.

Public Health Research Center — Dec 2015 - Jan 2018
Research Intern

- Assisted in the collection and analysis of health survey data.
- Conducted literature reviews to support ongoing research projects.
- Collaborated with senior analysts to design data collection instruments.
- Participated in community outreach efforts to gather health-related data.
- Developed visual presentations to communicate research findings.
- Maintained organized records of research activities and findings.

ACHIEVEMENTS

- Played a key role in a project that reduced local disease incidence by 15% through targeted interventions.
- Contributed to a research paper that was awarded Best Paper at the State Public Health Conference.
- Recognized for outstanding performance during internship with a Letter of Recommendation from the Director.
