- San Francisco, CA

### SKILLS

- Technology Integration
- CAD Design
- Prototyping
- Material Science
- Team Training
- Woodworking

### LANGUAGES

- English
- Spanish
- French

### EDUCATION

**BACHELOR OF ARTS IN BOAT DESIGN,  
TECHNOLOGY COLLEGE, 2014**

### ACHIEVEMENTS

- Developed a patented design for a hybrid boat model that gained industry recognition.
- Increased project efficiency by 35% through technological enhancements.
- Featured in industry publications for contributions to modern boat building techniques.

### WORK EXPERIENCE

#### BOAT CARPENTER AND TECHNOLOGIST

TechMarine Innovations

2020 - 2025

- Developed innovative boat designs using CAD software, enhancing precision and creativity.
- Implemented 3D printing techniques for prototyping boat components.
- Trained team members on the integration of technology into traditional carpentry practices.
- Collaborated with designers to create ergonomic and functional vessel layouts.
- Conducted research on new materials to improve performance and sustainability.
- Participated in trade shows to present advancements in boat building technology.

#### BOAT CARPENTER

Classic Yachts Co.

2015 - 2020

- Constructed and repaired wooden boats with a focus on traditional techniques.
- Engaged in detailed woodworking to achieve high standards of finish and durability.
- Collaborated with craftsmen to ensure consistency in quality across projects.
- Maintained equipment and tools to ensure optimal performance.
- Participated in client consultations to refine design elements based on feedback.
- Documented processes to establish standards and improve practices.
