

# MICHAEL ANDERSON

## Broodstock Management Assistant

A driven Broodstock Management Specialist with a robust foundation in aquatic sciences and over 5 years of experience in broodstock management and genetic research. Demonstrates a keen understanding of the intricacies of breeding programs and the application of genetic analysis tools to enhance fish health and productivity. Known for a collaborative approach to problem-solving and a commitment to sustainable aquaculture practices.

### WORK EXPERIENCE

#### Broodstock Management Assistant

2020-2023

Green Waters Aquaculture

- Assisted in the management of breeding programs for various fish species.
- Conducted health assessments and monitored broodstock conditions.
- Utilized genetic software to track breeding data and outcomes.
- Collaborated with team members to implement best practices in broodstock care.
- Participated in community outreach initiatives to promote aquaculture sustainability.
- Maintained accurate records of breeding activities and health metrics.

#### Aquaculture Intern

2019-2020

Freshwater Innovations

- Supported research on genetic improvement of broodstock populations.
- Assisted in data collection and analysis for breeding programs.
- Engaged in educational outreach to local communities.
- Collaborated with senior researchers on experimental design.
- Maintained laboratory equipment and ensured compliance with safety standards.
- Contributed to the preparation of reports and presentations.

### ACHIEVEMENTS

- Improved breeding program efficiency by 15% through data-driven practices.
- Recognized for contributions to community education initiatives in aquaculture.
- Contributed to research publications on broodstock management techniques.
