

MICHAEL ANDERSON

HERITAGE BUILDING SURVEYOR

PROFILE

Accomplished Building Surveyor with a robust background in heritage conservation and sustainable building practices. Over 12 years of experience in performing detailed assessments of historical properties, ensuring their preservation while integrating modern building standards. Expertise in liaising with government bodies and stakeholders to secure necessary approvals for restoration projects. Skilled in the use of advanced surveying technologies, enabling precise measurements and effective reporting.

EXPERIENCE

HERITAGE BUILDING SURVEYOR

Cultural Heritage Services

2016 - Present

- Conducted surveys of heritage-listed properties, assessing structural integrity and compliance.
- Developed conservation plans in collaboration with architects and historians.
- Facilitated community consultations to gather stakeholder feedback.
- Prepared detailed reports for government submissions, ensuring regulatory adherence.
- Utilized drone technology for aerial assessments of hard-to-reach structures.
- Trained junior surveyors on heritage preservation methodologies.

BUILDING SURVEYOR

EcoBuild Solutions

2014 - 2016

- Performed energy efficiency assessments for residential and commercial properties.
- Advised clients on sustainable building materials and practices.
- Managed projects to retrofit buildings with environmentally-friendly solutions.
- Collaborated with engineers to design energy-efficient systems.
- Conducted training sessions on sustainability for clients and colleagues.
- Published findings on energy efficiency improvements in industry reports.
