

MICHAEL ANDERSON

CARBON STRATEGY DIRECTOR

PROFILE

Dynamic and results-oriented Carbon Management Officer with a robust background in environmental policy and corporate sustainability. Demonstrated success in designing and implementing carbon reduction frameworks that enhance business resilience while meeting regulatory compliance. Expertise in stakeholder engagement ensures the seamless integration of sustainability initiatives into organizational strategies. This candidate possesses a strong analytical mindset, enabling the identification of carbon reduction opportunities through data-driven decision-making.

EXPERIENCE

CARBON STRATEGY DIRECTOR

Sustainable Innovations Corp.

2016 - Present

- Directed the formulation of corporate carbon policies that align with international climate agreements.
- Oversaw the implementation of carbon management systems across multiple business units.
- Engaged with local communities to promote awareness and support for sustainability initiatives.
- Utilized predictive modeling to forecast emissions reductions and assess project viability.
- Facilitated training programs to empower employees in sustainability practices.
- Coordinated with external auditors to validate carbon reporting and compliance.

SUSTAINABILITY ANALYST

EcoVision Partners

2014 - 2016

- Conducted lifecycle assessments to identify carbon hotspots in product development.
- Developed sustainability dashboards for real-time monitoring of carbon metrics.
- Collaborated with product teams to integrate sustainable materials into new designs.
- Assisted in the preparation of annual sustainability reports.
- Engaged with suppliers to promote sustainable sourcing practices.
- Presented sustainability findings to stakeholders, driving engagement and support.
