### SKILLS

- carbon technology
- software development
- stakeholder engagement
- engineering collaboration
- data simulation
- compliance management

### LANGUAGES

- English
- Spanish
- French

### EDUCATION

**BACHELOR OF SCIENCE IN ENVIRONMENTAL ENGINEERING, MIT, 2015**

### ACHIEVEMENTS

- Developed a proprietary software tool that improved carbon tracking accuracy by 30%.
- Recognized for pioneering innovative carbon management solutions in 2022.
- Published findings on the impact of technology on carbon management in industry journals.

### WORK EXPERIENCE

#### CARBON TECHNOLOGY MANAGER

TechGreen Solutions

2020 - 2025

- Led the development of technology-driven carbon management solutions that improved efficiency by 20%.
- Implemented software tools for real-time carbon tracking and reporting.
- Collaborated with R&D teams to innovate sustainable technologies.
- Facilitated training sessions on the use of new carbon management technologies.
- Engaged with clients to customize technology solutions for carbon reduction.
- Monitored industry trends to identify emerging technologies in carbon management.

#### SUSTAINABILITY ENGINEER

GreenTech Innovations

2015 - 2020

- Conducted assessments of carbon reduction technologies for various projects.
- Collaborated with engineering teams to integrate sustainability into design processes.
- Developed simulation models to evaluate the effectiveness of carbon reduction strategies.
- Prepared technical reports on carbon management initiatives.
- Engaged with regulatory agencies to ensure compliance with environmental standards.
- Presented technical findings to clients to support decision-making.
