- French

Compassionate Cardiac Care Nurse with 8 years of nursing experience and a focus on cardiac diagnostics and intervention. I have worked extensively in the cardiac catheterization lab, providing patient care throughout the diagnostic process. My role involves preparing patients for procedures, monitoring their condition, and providing post-procedure education.

💼 WORK EXPERIENCE

Cardiac Catheterization Nurse 2020-2023

Cardiac Center of Excellence

- Prepared patients for cardiac catheterization procedures, ensuring understanding and comfort.
- Monitored patients' vital signs and assessments before, during, and after procedures.
- Collaborated with cardiologists to perform diagnostic tests and interventions.
- Provided education on post-procedure care and lifestyle changes.
- Maintained accurate documentation of patient interactions and outcomes.
- Participated in quality improvement projects to enhance patient safety.

Staff Nurse - Cardiac Care Unit 2019-2020

Regional Medical Center

- Cared for patients recovering from cardiac interventions and surgeries.
- Monitored cardiac rhythms and vital signs, assessing for complications.
- Educated patients on managing heart conditions and lifestyle modifications.
- Assisted in coordinating care with interdisciplinary teams.
- Documented care and patient progress in electronic health records.
- Supported the training of new nursing staff in cardiac care protocols.

★ ACHIEVEMENTS

- Improved patient satisfaction scores in the cardiac catheterization lab by 30% through enhanced communication.
- Recognized for excellence in teamwork and patient advocacy in 2021.
- Contributed to a reduction in post-procedure complications in the unit.
