- San Francisco, CA

SKILLS

- Genetic Improvement
- Data Analysis
- Breeding Strategies
- Team Collaboration
- Market Trends
- Compliance Management

LANGUAGES

- English
- Spanish
- French

EDUCATION

BACHELOR OF SCIENCE IN GENETICS, AGRIUNIVERSITY, 2012

ACHIEVEMENTS

- Increased herd genetic diversity by 30% through targeted breeding.
- Recognized for contributions to advancements in cattle genetics.
- Successfully improved calving rates by 20% through innovative techniques.

Highly skilled Cattle Production Specialist with a focus on genetic improvement and herd optimization strategies. Over 9 years of experience in managing cattle breeding programs, utilizing advanced reproductive technologies to enhance genetic traits. Demonstrated success in implementing data-driven decision-making processes that significantly improve herd performance and profitability. Strong ability to analyze market trends and adjust production strategies accordingly, ensuring competitiveness in the agricultural sector.

WORK EXPERIENCE

GENETICS AND BREEDING COORDINATOR

CattleGen Innovations

2020 - 2025

- Coordinated breeding programs focusing on genetic trait enhancement.
- Applied reproductive technologies to improve calving outcomes.
- Analyzed performance data to inform breeding decisions.
- Conducted training sessions on genetic management for staff.
- Collaborated with researchers on genetic studies.
- Managed breeding records and compliance documentation.

CATTLE PRODUCTION ANALYST

AgriTech Solutions

2015 - 2020

- Analyzed herd performance metrics to identify improvement areas.
- Developed reports on production trends and forecasting.
- Collaborated with production teams to implement data-driven strategies.
- Monitored and assessed the effectiveness of breeding programs.
- Engaged with stakeholders on genetic improvement initiatives.
- Led workshops to educate farmers on genetic technologies.
