Dynamic Chemical Environmental Engineer with over 4 years of experience in the waste management sector, focusing on innovative solutions for recycling and waste reduction. I have a solid foundation in chemical engineering combined with a passion for environmental sustainability. My expertise includes designing recycling programs, conducting waste audits, and developing strategies that enhance resource recovery.

## WORK EXPERIENCE

### Waste Management Engineer | RecycleWise Corp.

Jan 2022 – Present

- Designed a comprehensive recycling program that increased recycling rates by 35% across multiple facilities.
- Conducted waste audits to identify reduction opportunities, resulting in a 20% decrease in waste generated.
- Collaborated with local governments to promote community recycling initiatives.
- Developed educational materials on sustainable waste management practices.
- Utilized data analysis tools to monitor program effectiveness and improve strategies.
- Presented workshops for businesses on best practices for waste reduction and recycling.

### Environmental Consultant | Green Earth Solutions

Jul 2019 – Dec 2021

- Advised businesses on compliance with waste management regulations and recycling standards.
- Conducted assessments of waste management practices, providing recommendations for improvement.
- Collaborated with teams to design waste reduction strategies tailored to client needs.
- Prepared reports detailing findings and proposed solutions for waste management challenges.
- Engaged with community stakeholders to educate on recycling and waste reduction.
- Utilized software tools to track waste management metrics and develop action plans.
