- French

Versatile Chemical Production Engineer with a robust background in the food and beverage industry. Over 6 years of experience in optimizing production processes for food-grade chemicals. I have a proven ability to manage projects that enhance production efficiency while ensuring compliance with health and safety regulations. My skills include process design, quality assurance, and team management.

💼 WORK EXPERIENCE

Chemical Production Engineer
2020-2023

FoodTech Chemicals

- Managed production processes for food-grade chemicals, ensuring compliance with industry standards.
- Conducted process audits that led to a 15% increase in production efficiency.
- Collaborated with quality assurance to develop testing protocols for new products.
- Implemented change management strategies for process improvements.
- Trained production staff on best practices in food safety compliance.
- Prepared and presented regular reports on production metrics to senior management.

Process Improvement Engineer
2019-2020

Beverage Innovations Inc.

- Supported the development of new beverage formulations through effective process design.
- Optimized production workflows, resulting in a 10% reduction in processing time.
- Engaged in cross-functional teams to enhance product quality and safety.
- Conducted training sessions on quality control measures for production staff.
- Maintained compliance with health regulations through regular inspections.
- Analyzed production data to recommend improvements and streamline processes.

★ ACHIEVEMENTS

- Achieved a 20% reduction in production costs through process initiatives.
- Recognized for implementing a successful training program for quality control practices.
- Received 'Best Team Player' award for contributions to team projects.
