Proficient City Governance Research Analyst with a focus on public health policy and urban health systems. Expertise in conducting research that informs public health strategies and initiatives within urban settings. Proven ability to analyze health data to support policy development aimed at improving population health outcomes. Committed to fostering collaboration between health departments and community organizations to enhance public health service delivery.

WORK EXPERIENCE

Public Health Research Analyst   2020-2023

Urban Health Institute

- Conducted research on urban health disparities and access to services.
- Developed health policy recommendations based on research findings.
- Collaborated with health organizations to promote public health initiatives.
- Analyzed health data to assess program effectiveness.
- Presented research findings to public health officials and stakeholders.
- Maintained databases tracking health indicators and outcomes.

Research Assistant   2019-2020

Center for Urban Health

- Assisted in research projects focused on urban public health challenges.
- Conducted literature reviews to inform health policy development.
- Engaged with community stakeholders to promote health awareness.
- Developed reports on health program outcomes for city officials.
- Coordinated focus groups to gather community input on health services.
- Published findings in health journals and reports.

ACHIEVEMENTS

- Developed a public health initiative that reduced disease incidence by 30%.
- Received recognition for outstanding research in urban health policy.
- Contributed to a city health plan that improved access to services for underserved populations.
