### SKILLS

- quantitative analysis
- climate policy
- stakeholder engagement
- public communication
- project evaluation
- international collaboration

### EDUCATION

M.P.A. IN ENVIRONMENTAL POLICY,  
COLUMBIA UNIVERSITY

### LANGUAGE

- English
- Spanish
- German

### ACHIEVEMENTS

- Influenced the adoption of climate technologies in over 10 countries through research findings.
- Secured \$750,000 in funding for international climate research projects.
- Published influential articles in leading environmental journals, enhancing public awareness.

# Michael Anderson

## CLIMATE RESEARCH SPECIALIST

Strategic Climate Technology Researcher with a rich background in the intersection of technology, policy, and environmental science. Proven track record of conducting thorough research that informs climate action strategies at various levels of governance. Expertise in utilizing quantitative research methods to analyze the efficacy of climate interventions. Recognized for the ability to convey complex research findings to non-expert audiences, fostering greater public understanding of climate issues.

### EXPERIENCE

#### CLIMATE RESEARCH SPECIALIST

International Climate Initiative  
2016 - Present

- Conducted evaluations of climate technology projects across multiple countries.
- Collaborated with international teams to develop best practices for climate interventions.
- Utilized advanced analytical tools to assess project impacts and outcomes.
- Engaged with policymakers to inform climate-related decisions based on research findings.
- Facilitated knowledge-sharing workshops to promote global best practices.
- Authored technical reports that influenced international climate policies.

#### RESEARCH ANALYST

Center for Climate Solutions  
2014 - 2016

- Analyzed data sets to evaluate the impact of climate policies on emissions reduction.
- Conducted stakeholder interviews to gather insights on climate technology adoption.
- Prepared reports summarizing research findings for use by government agencies.
- Participated in public forums to discuss climate challenges and solutions.
- Supported the development of educational programs on climate adaptation strategies.
- Contributed to grant proposals that secured funding for climate research initiatives.
