SKILLS

- renewable energy policy
- risk assessment
- data modeling
- stakeholder engagement
- policy advocacy
- report writing

LANGUAGES

- English
- Spanish
- French

EDUCATION

MASTER OF SCIENCE IN ENVIRONMENTAL SCIENCE, STANFORD UNIVERSITY

ACHIEVEMENTS

- Instrumental in developing a national renewable energy strategy.
- Recognized for contributions to climate and energy research by the Energy Association.
- Secured funding for renewable energy projects exceeding \$1 million.

WORK EXPERIENCE

RENEWABLE ENERGY ANALYST

Green Energy Solutions

2020 - 2025

- Conducted assessments of renewable energy systems under climate change scenarios.
- Developed policy recommendations to enhance energy resilience.
- Collaborated with government agencies on energy transition initiatives.
- Utilized modeling tools to evaluate energy supply risks.
- Facilitated stakeholder engagement sessions on renewable energy policies.
- Authored reports that influenced national energy strategies.

CLIMATE POLICY ANALYST

National Renewable Energy Laboratory

2015 - 2020

- Analyzed the impact of climate policies on renewable energy adoption.
- Developed frameworks for integrating climate considerations into energy planning.
- Engaged with industry stakeholders to promote best practices.
- Conducted workshops to educate on climate and energy interconnections.
- Presented findings at energy policy conferences.
- Contributed to publications on renewable energy and climate change.
