- French

EDUCATION

**M.P.H. IN BIostatISTICS, JOHNS
HOPKINS UNIVERSITY**

ACHIEVEMENTS

- Contributed to a study that received the 'Best Community Health Research Award' in 2021.
- Successfully wrote and secured funding for two public health grants.
- Published research findings in a leading public health journal, enhancing visibility.

WORK EXPERIENCE

RESEARCH BIOSTATISTICIAN

Public Health Research Center

2020 - 2025

- Conducted statistical analysis for community-based health initiatives, impacting policy changes.
- Collaborated with public health officials to design studies addressing health disparities.
- Utilized SPSS for data management and analysis, improving study efficiency.
- Presented research findings to community stakeholders, fostering engagement and support.
- Developed statistical reports that informed funding proposals for public health projects.
- Mentored students in biostatistical methods, enhancing academic research capacity.

BIOSTATISTICIAN INTERN

University Health System

2015 - 2020

- Supported faculty in conducting statistical analyses for public health research projects.
- Assisted in data cleaning and preparation, ensuring data integrity for analysis.
- Participated in the development of research protocols and study designs.
- Contributed to the preparation of manuscripts for publication in academic journals.
- Engaged in literature reviews to support research hypotheses and methodologies.
- Presented findings at departmental meetings, enhancing collaborative efforts.
